ABOUT ME:

I am a **frontend developer** with experience in **React, Next.js, and TypeScript**. I am from Ukraine and currently live in Serbia. I am looking for **remote opportunities** where I can contribute my skills and grow as a developer.

KNOWLEDGE SUMMARY:

- **Frontend:** ReactJS, Next.js, TypeScript, React Redux, React Hooks, React Router, API requests

- **UI Libraries:** Ant Design, MUI, Rsuite, Bootstrap

- **Backend & Data:** Firebase, REST API, Axios, Moment.js, Swagger, Postman

- **Development Tools:** Git, GitHub, Ubuntu, Linux Mint, React Google Charts, React Flow, Chrome DevTools, VS Code

- **Other:** Internationalization (i18next), React DnD, Chart.js

EXPERIENCE:

Frontend Developer (React)

Fennec App (via Upwork), 03.-12.2024

- Developed interactive dashboards with dynamic data visualization.
- Created and optimized complex tables handling large datasets.
- Implemented API requests (GET, POST, PUT, DELETE).
- Designed UI mockups and enhanced user experience.
- Collaborated with backend developers to define API structures.
- Maintained documentation and provided weekly reports.
- Suggested optimal solutions for complex business logic.

Frontend Developer (React, Next.js, TypeScript)

Freelance, 05.2022-10.2023

- Developed and refined single-page applications.
- Fixed bugs and optimized code.
- Integrated APIs and configured backend interactions.
- Improved performance and responsiveness of user interfaces.

LANGUAGES:

- **English** – Professional proficiency
- **Ukrainian** – Fluent
- **Russian** – Native

EDUCATION:

- **B.Sc., Communication Networks** – ONAT (Ukraine), 2011-2016
- **Web & Mobile Development** – Tel Ran (Israel), 2022

PROJECTS:

Shu Sudoku (Personal Project)
- **Tech Stack:** Next.js, TypeScript, Redux Toolkit, Ant Design, Firebase
- Built an interactive Sudoku game with real-time validation.
- Implemented game state management with Redux.
- Designed a clean and user-friendly UI.
- Added visual effects like error highlighting and confetti animations.
- **GitHub**: [Shu Sudoku](#)

Recipe Management App (Personal Project, in Progress)
- **Tech Stack:** Next.js, TypeScript, Firebase
- Allows users to add, edit, and organize their personal recipes.
- Implements authentication and real-time data storage with Firebase.
- Focuses on minimalistic and intuitive UI design.
- **GitHub**: [Recipe Management App](#)

Cleaning Service Marketplace (Cleanit)
- **Tech Stack:** React, Firebase, Redux, MUI
- Created a network for searching and hiring cleaning services.
- Implemented a user-based authentication system.
- Developed a catalog of available workers.
- Built a personal user area for managing services.
- **GitHub**: [CleanIt](#)
